Subject: FS and Oregon DSL Rules

Hi Kristine,

Based on recent discussion on sediment remediation projects outside of Portland Harbor, I wanted check in and confirm that EPA is considering the Oregon Department of State Lands Division 145 rules in the FS. DSL adopted these rules in June of 2013 to address remediation and habitat restoration activities on state owned submerged and submersible lands. The rules address how ODSL meets its public trust responsibilities and is compensated for the sale or granting of authorizations for the use of state land for remediation and restoration activities. These costs may be considerable and should be considered in the FS. If you have specific questions related to these rules, please let Tom Roick know, and he will coordinate with ODSL.
